

Industrial Hygiene Services

Industrial Hygienists are safety professionals.

There is a method to the madness of occupational health and safety. Certified Industrial Hygienists are credentialed professional investigators who identify and define safety or health problems in the workplace; create reasonable and effective solutions; and provide peace of mind for employees and employers alike.

Our Certified Industrial Hygienists:

- **Anticipate**, identify and evaluate hazardous conditions and practices.
- **Develop** hazard control designs, methods, procedures and programs.
- **Implement**, administer and advise others on hazard controls and hazard control programs.
- **Measure**, audit and evaluate the effectiveness of hazard controls and hazard control programs.

Our professionals understand the need to develop cost-effective programs to minimize risks and injuries in the workplace. Using our knowledge of regulatory requirements, GENI will work closely with you as a partner to evaluate your needs and implement cost effective and timely solutions. Whether you need effective training programs, indoor air quality studies, programs for respiratory hazards in the construction, or cost-effective engineering controls, choose Global Environmental Network, Inc. for creative, responsive, and practical industrial hygiene solutions. Environmental Network, Inc. for creative, responsive, and practical industrial hygiene solutions.
